

FIRE AWARENESS TRAINING

Fire Safety Training at
your premises

Up to 15 Persons
2 HOUR COURSE

Why should employees receive Fire Awareness Training?

In a fire, the immediate actions of your staff can help to save lives if they have the correct knowledge and information. Fire Awareness training is important for ensuring that staff know what to do to prevent fires from happening and how to evacuate the building safely in the event of a fire. It is also a requirement of the Regulatory Reform (Fire Safety) Order 2005 for all employees to understand basic fire safety.

Surefire offer Fire Awareness, Fire Warden and First Aid Training Courses all delivered at your premises at a time convenient to you. Every attendee will learn the basics of fire safety and get a chance to experience using a fire extinguisher in a participative live fire demonstration.
