

FIRE WARDEN TRAINING

Fire Safety Training at
your premises

Up to 15 Persons
3 HOUR COURSE

Why should employees receive Fire Warden Training?

In a fire, the immediate actions of your staff can help to save lives if they have the correct knowledge and information. Appointing an appropriate number of fire wardens to implement fire safety measures is a key part of all fire safety legislation in the UK to conform with the Regulatory Reform (Fire Safety) Order 2005. Fire Wardens will carry out regular fire drills to ensure that all occupants evacuate the building safely.

Surefire offer Fire Warden Courses delivered at your premises at a time convenient to you. Every attendee will learn the roles and responsibilities of fire wardens and get a chance to experience using a fire extinguisher in a participative live fire demonstration.
